- Research and Development
- Prototypes and Pilot Series

Knut Niehaus is a precision engineer, welding specialist (master), programmer and communication electronics engineer. He has worked as a network manager, IT service provider and service manager, before he became a developer and product manager for drone and industrial manufacturers from China and Germany. He is a thoroughbred inventor, developer and innovative designer.

Andrey Sevryukov

GIS & Drone Expert Odessa/Ukraine

- Digital Farming /Precision Farming
- Data Analyse & Platform Software

Andrey and his teams of various experts are focused to support family farmers (small holder farmers). He argues that these farmers account for up to 80% of agricultural production, while more and more people have to be fed from ever smaller areas. His approach is to support family farmers digitally and to establish innovative fertilization and planting methods, e.g. near deserts. His team developed an own multispectrale camera and used its own systems on 3 continents with over 180 thousand hectares.
