

# Soil Transformation

Desert soil to arable land transformation Oman

# Soil Bio Organic Transformation

The technology allows you to start the natural process of biocenosis on infertile soils, restoring their fertility and getting stable high yields. Based on organic process of high speed humus formation ( over 1000 times faster).

# Oman Agriculture

Is very versatile

there are good areas

and desert....

From here - about desert

# Start Oman 2018

- 76% Sand
- 24% Feldspat
- 0% Organic ( Humus )
- 60 ha

# The process

**Land Preparation**  
flaten  
and shape in  
rows

**Mix with  
supplements**  
6% organic  
fertilizer &  
special  
bacterias

**Cover for 2-3  
days**  
stop  
evaporation  
and accumulate  
CO<sub>2</sub>

**Fertile Soil  
Ready**

# Secret

Special organic compound produced by soil microorganisms. We found the way to reproduce it and implement in a technology to bring life to deserts.
